Junior Software Engineer – Zuru Tech Italy 2019/04 - 2021/06

PROJECTS & RESEARCH

Marble Garden – videogame (unpublished) 2019/07 – 2020/12

Master Thesis – AR localization with Unity & ARCore (Fraunhofer) 2018/04 – 2018/10

- Published paper

Bachelor Thesis – Gaze estimation with Kinect v2 2016/03 - 2016/07

Procedural generation personal projects

- Procedural planets and Infinite terrain generation (UE4 and noise algorithms)

EDUCATION

M.Sc. in Computer Science: Software Engineering & IT Management 2016/10 – 2018/10

Free University of Bolzano - 109/110

B.Sc. in Informatic Engineering 2011/10 – 2016/07

University of Florence - 96/110

ADDITIONAL INFORMATION

Skills: Gameplay – 3C, Refactoring, Cross-department collaboration

Programming languages: C++, C#, C, Python, WebGL

Technologies: Unreal Engine, Unity3D (2018), Snowdrop, ARCore 1.0, Vuforia 6

Tools: Jira, Perforce, Git, Microsoft Kinect 2, Visual Studio, Gitlab

Languages: Italian, English

Certificates: Italian qualification to practice the profession of Informatics Engineer 2018/11

LEISURE TIME

I mainly play videogames; they are my passion and I love going in other worlds with them. I like being in nature, feel it and understand it: a good walking heals me in many ways. I'm a curious person, I want to understand the world more and more! I am a good listener and I try to learn from anyone I meet. I love technology and I follow how it continuously improves, I discuss about the new inventions and how they can be used, from ethical to practical. I improve my programming skills in the free time, following the latest updates from C++ and GDC.
